

## Curves and angles

### Add shape to your room design!

When creating a wetroom adding shape can be very important to the design. It may be including a curved wall or sink area or even curved steps leading up to the bath. Marmox makes this easy with Marmox curved boards which are sheets that can be easily curved to circular shapes. Also there is Marmox pipe boxing can be folded to a 90° angle for boxing in unsightly pipe work without the cost of having to build a timber frame.

- easily cover pipework
- create stylish curves
- ready to receive tiles
- lightweight
- easy to cut with a saw or knife
- waterproof

## Curves and angles

### What are Marmox curved boards?

Curved boards are made from the same material as standard Marmox Multiboards. They are lightweight, easy to handle, insulated boards made of extruded polystyrene and coated on each side with a close woven fibreglass mesh embedded in a cement polymer mortar. The curved boards have horizontal lines cut into them to allow them to bend to the appropriate curve.

### What is Marmox pipe boxing?

Marmox pipe boxing again is made from the same material as standard Marmox Multiboards. They are available in four different sizes to cover up small or large areas of pipework. The pipe boxing comes in flat sheets that bend to a 90° angle and can then be sealed with a self adhesive tape along the fold.

## Sizes

Product	Width (mm)	Length (mm)	Thickness (mm)	Weight (kg)
Pipe boxing	150x150	1250	20	1.17
Pipe boxing	200x200	1250	20	1.56
Pipe boxing	300x300	1250	20	2.90
Pipe boxing	400x200	1250	20	2.90
Curved board	600	1250	20	2.38
